Instructions to fill the questionnaire

- All questions should be compulsorily attempted.
- Each question has five responses, choose the most appropriate one.
- The response to the qualitative question **no. 19** is student’s opportunity to give suggestions or improvements; she/he can also mention weaknesses of the institute here. (Kindly restrict your response to teaching learning process only)

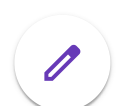

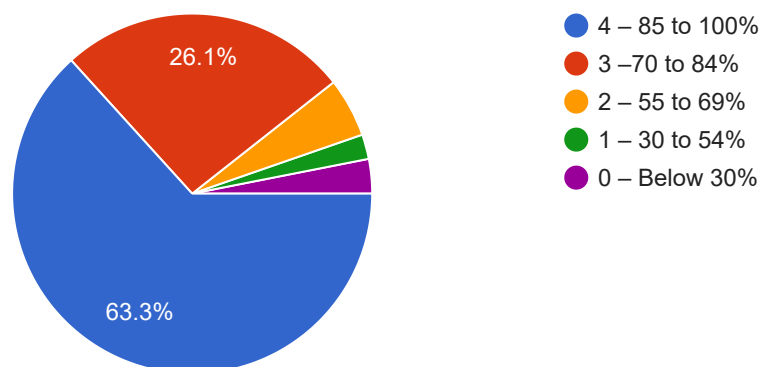

Following are questions for online student satisfaction survey regarding teaching learning process.

51 responses

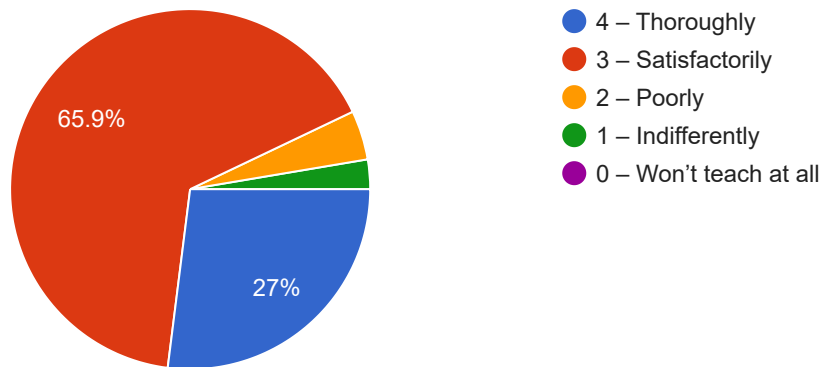

i) How much of the syllabus was covered in the class

226 responses

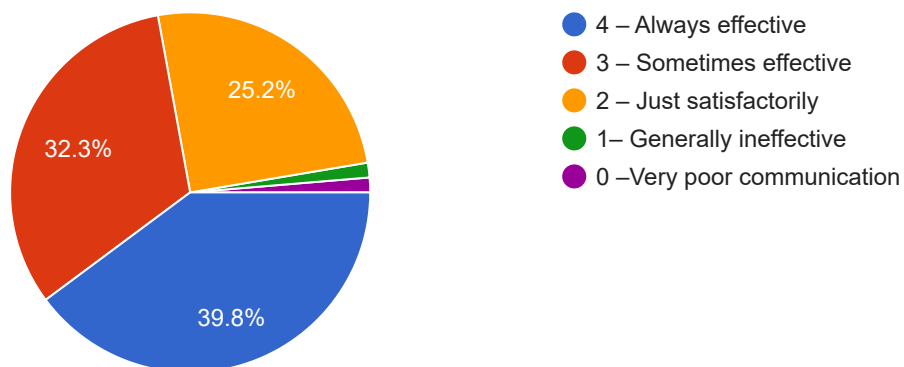

II) How well did the teachers prepare for the classes?

226 responses

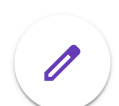

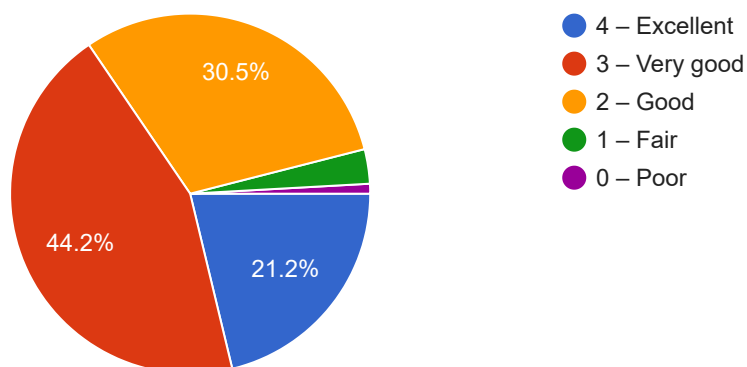

III) How well were the teachers able to communicate?

226 responses

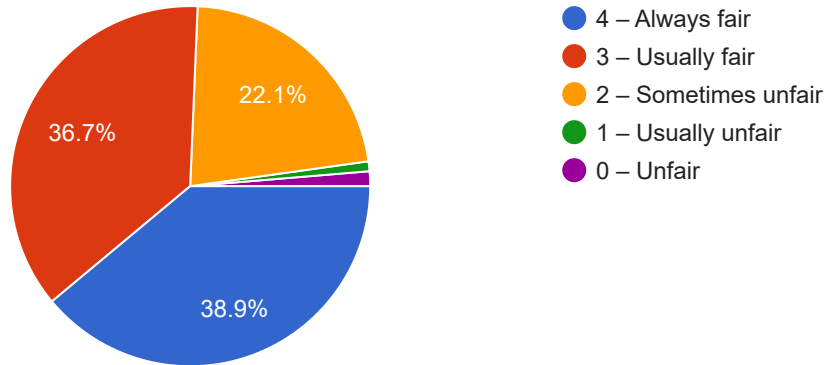

IV) The teacher's approach to teaching can best be described as

226 responses

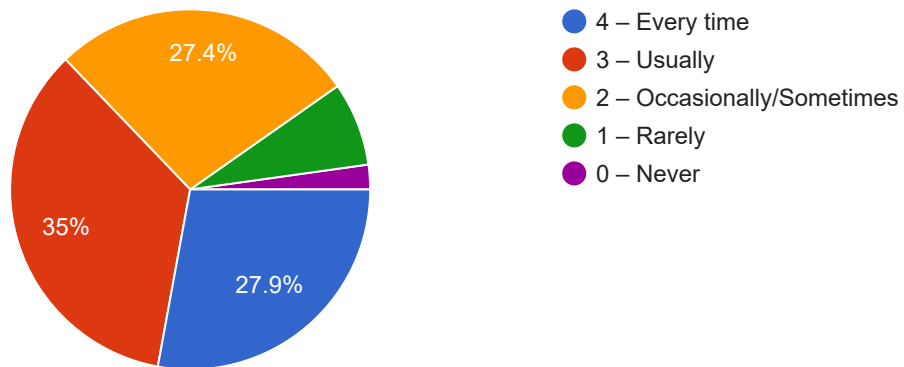

V) Fairness of the internal evaluation process by the teachers.

226 responses

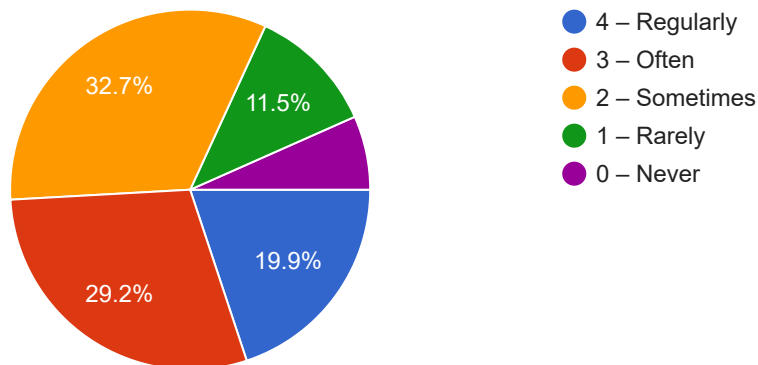

VI) Was your performance in assignments discussed with you?

226 responses

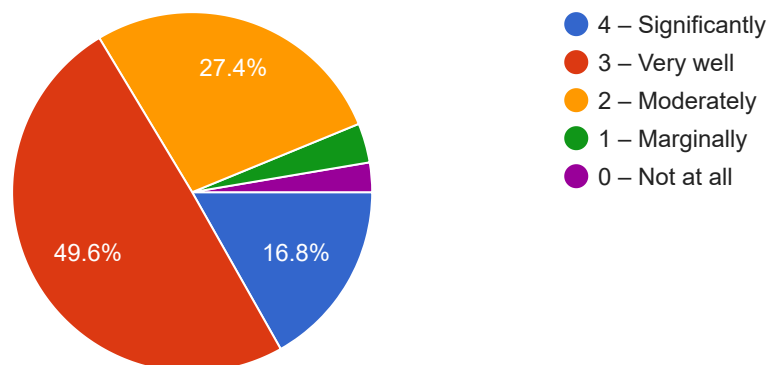

VII) The college takes active interest in promoting internship, student exchange, and field visit opportunities for students.

226 responses

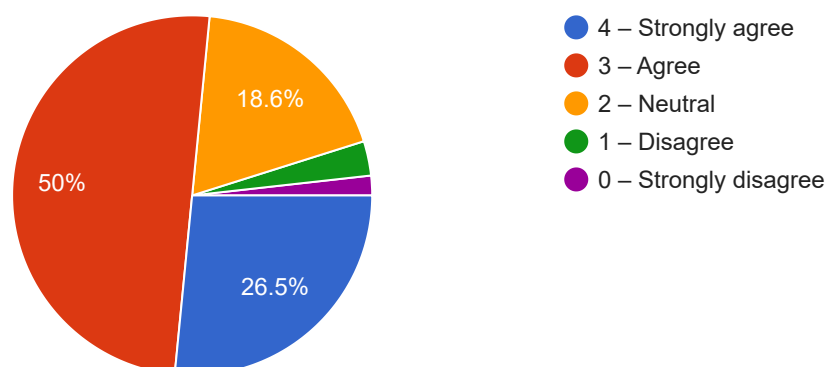

VIII) The teaching and mentoring process in the college facilitates you in cognitive, social and emotional growth.

226 responses

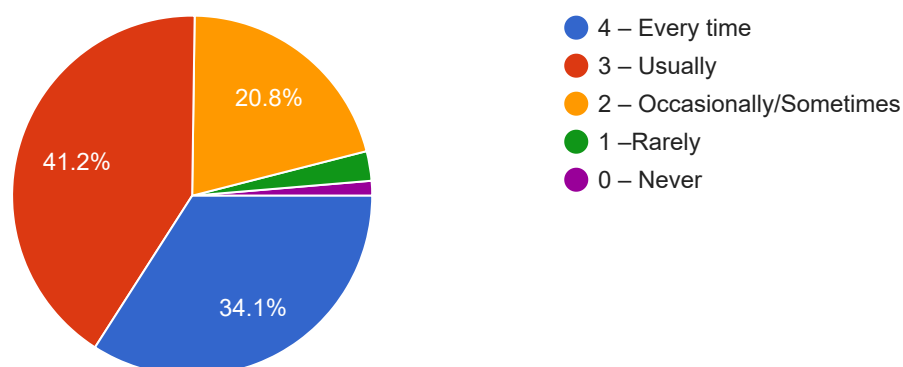

IX) The college provides multiple opportunities to learn and grow.

226 responses

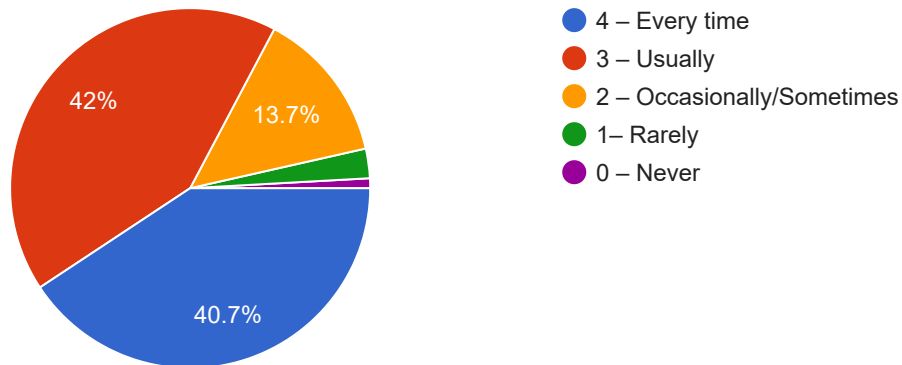

X) Teachers inform you about your expected competencies, course outcomes and programme outcomes.

226 responses

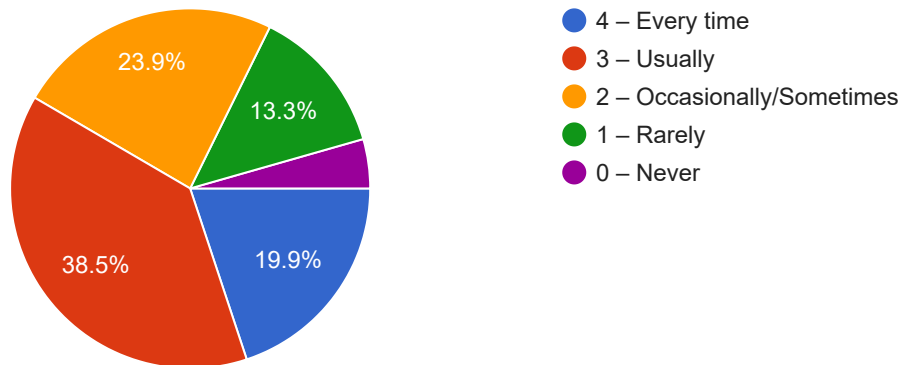

XI) The teachers illustrate the concepts through examples and applications.

226 responses

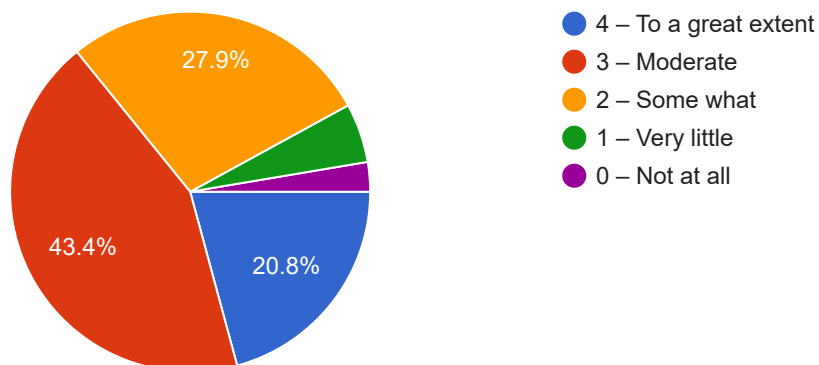

XII) Teachers are able to identify your weaknesses and help you to overcome them.

226 responses

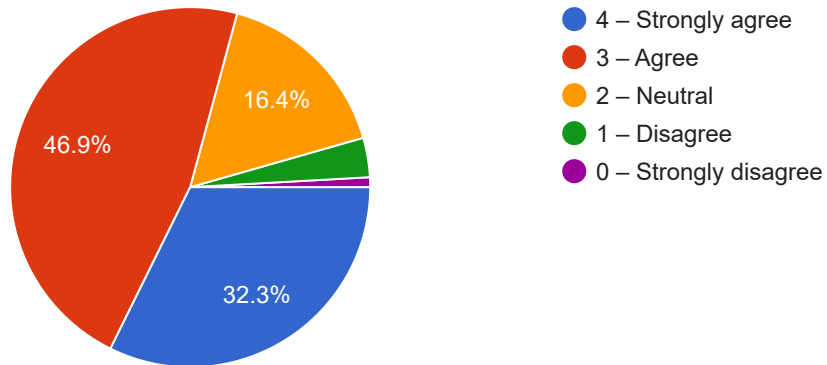

XIII) The institute/ teachers use student centric methods, such as experiential learning, participative learning and problem solving methodologies for enhancing learning experiences.

226 responses

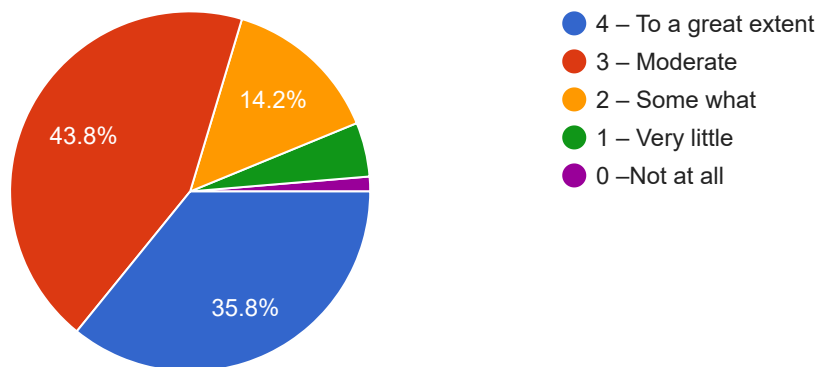

XIV) Teachers encourage you to participate in extracurricular activities.

226 responses

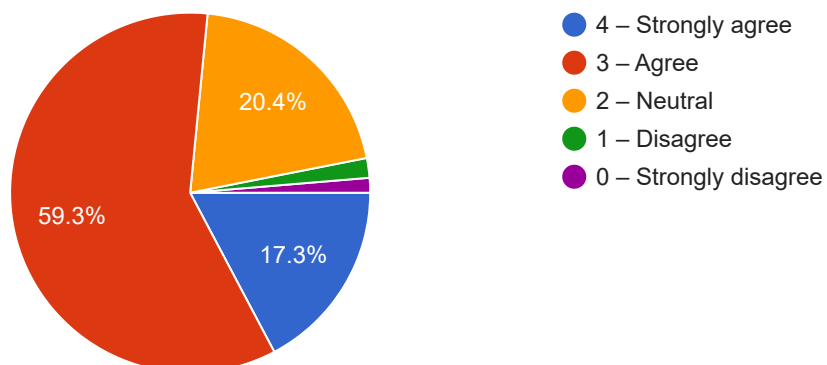

XV) Efforts are made by the institute/ teachers to inculcate soft skills, life skills and employability skills to make you ready for the world of work.

226 responses

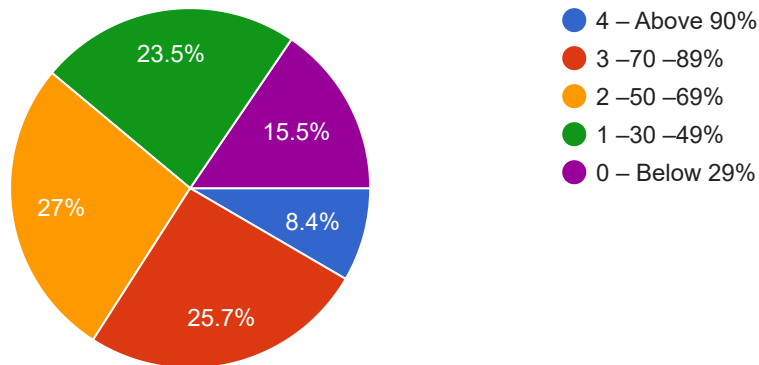

XVI) The college makes effort to engage students in the monitoring, review and continuous quality improvement of the teaching learning process.

226 responses

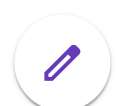

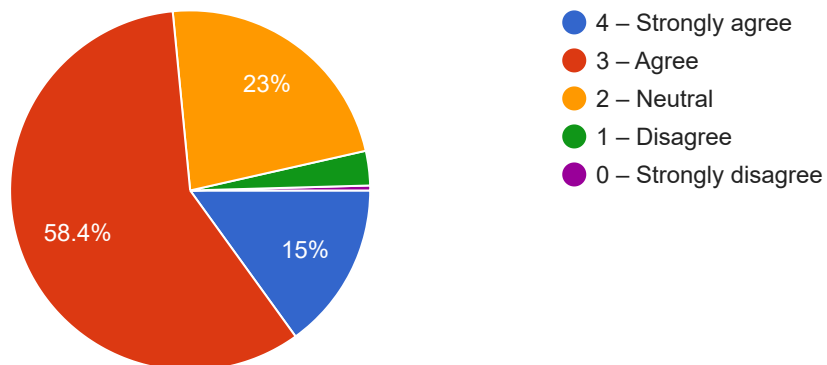

XVII) What percentage of teachers use ICT tools such as LCD projector, Multimedia, etc. while teaching.

226 responses

XVIII) The overall quality of teaching-learning process in the college is very good.

226 responses

XIX) Give three observation / suggestions to improve the overall teaching – learning experience in the college.

Understanding

Yes

Laboratory
More smart classes
Field trips

- 1.Fair internal marks based on performance
- 2.Recognise unprivileged students
- 3.No partiality .

College lacks facilities for students
And since it's college it would be better
If they don't treat us like a highschooler
And programmes and events are hosted very
Poorly it would be a lot better if they host programmes in a good manner

No suggestion since I feel everything is going on properly in the college

Everything is good so far

So far everything's going well.

Teacher's should be fair, must know the students,

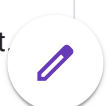

Some teachers really need to come out from coma zone like Sir Meyatemsu always stuck at one corner never progress nor get promoted..

Those teachers who have soft voice high time to increase their volume we barely hear them.

- 1: Good teaching
- 2:Easy to understand
- 3: Motivating us always

Good

Be patient and understanding , provide variety of learning materials,seek feedback and reflect.

When joining C-Edge college I was nervous thinking how would the teachers be or how my seniors or classmates would be but i found it rather pleasing and calm environment around my college the teachers are so friendly to the extent that they treat us as their own family members.

Through this college I learned how to have confidence in myself and also helped me improve my studies, field work or anything ❤️

Come well prepared, loud and clear and sincerity

Field trip

More outdoor activities

Online games competition during sports

1. use better graphics and visual media to engage students well .
2. try to reach every students and ask for their doubts.
3. make teaching a two way interaction.

Collaborative learning, understanding student minds and course activities

- 1) students learn more at effectively when activities engage in learning process.
- 2) create a powerful learning loop .
- 3) positive response create a safe space for students .

To create inclusive and diverse learning environment

- 1) It will be nice if they don't go so deep in what they mean to say , just explaining in brief and providing examples are enough
- 2) To do a quick quiz or ask a quick question one what they have taught recently
- 3) To not get distracted easily and focus on what they have to say , and not going too fast , because it's hard to catch up

Upgrade sports and activities, experimental learning.

To teach with patience, and more meanings and to communicate with each and every student

1. Refrain from comparing students to teachers, as it fosters unhealthy competition and discourages learning (e.g., "I can do that, why can't you?"). Instead, focus on individual progress.
2. Avoid criticizing or insulting students when they struggle, as it creates a fear of asking questions and hinders the learning process. Encourage inquiry and provide supportive guidance.
- 3.....

Some Teachers should improve their teaching method

To use LCD projectors more often.

The teaching staffs are excellent 🙌

If Lcd screen were given to every semester it will indeed help in smart class where the students Will also learn more..then the formal education

Examples,interactive and explaining the unit teaching clearly

- 1.fair internal marks based on performance
- 2.Aproprate explanation based on the topic
- 3.Equal opportunities

Those who have soft pitch high time to upgrade ur pitch.
Use more projector for more interesting class

- 1.practical classes like in eco and FCA
- 2.Enchoraging classes
- 3.And individual interactive classes to understand the students

The college is like an Institute not for students but for the teachers because every semester our subject teachers change

It's ok for the additional subjects but for minor

Sub it's hard for the students to coop up with new teachers

Facilities.

Overall it's really good.

Good afternoon here is something I would like

to convey.One thing I've observed is that the institute is almost more focused on bookish teaching and learning. As I was about to enter the college stage of learning I had expected a more wide range for teaching and the learning method. I've seen other universities going out for surveys or occassionally opting for a learning method which was not only about the teachers coming in the class giving the explanation they prepared on paper and going out just like that. I don't really think like going out for surveys or so on are even really necessary given a couple of reason but some ways to enhance more of the teaching and learning process can be even taken up through maybe like the ICD tools which is also mentioned above and I gave the lowest rating for it because since my year of experience in the college I've never witnessed that (maybe other classes does it but not my department atleast). Maybe the overall teaching is not that bad despite some exception but viewing it on a college level education all I can observe is just what was done in high school (and in high school it uses more digital or other non bookish methods of learning). Maybe it is also in this area that the institution lacks compared to other colleges around here on the learning facilities and other activities too .

I know that this suggestion was only for the teaching and learning method but firstly asking for apologise I also wanted to share something about the attendance and make up class method.

I know it is impossible for this thing to actually happen but I really wished the class routine system was a little more inflexible than this. As of now we just get off anytime we want when we don't have class but this method is also really a problem for the massive amount of absentees and lack of attendance among the students. Maybe we can just get off at one official time like the high school method or make a strict rule in the closings and opening of the college gate. I thought that our college timing method was the same in all Colleges this way but I found out that some institution maintained a timing like the once in high school, which I think is a better option for a healthy education environment which would also enhance

the attendance percentage among the students. I have heard people coming to C - edge college because it was a very free or relaxed institute about the timing and that students can leave anytime they want because the gate stays open. It kind of made me sad how people viewed the college which iam attending this way but they were not at fault too because it wasn't a lie either. I'm sorry for this really long paragraph but another thing is the makeup class. I don't have a problem with the makeup class and instead I thank the institute for giving us opportunity and helping us keep our required attendance for the exam in check. But the thing is about the fee . I as a student feels like if we have cleared the classes why would it be necessary for us to clear it in amount too. It's the fact that after we complete our work we had to make a payment too which I feel sits not really necessary on the part of the teachers instead of that they can put more strict rules on the makeup classes maybe even stay extra hours after the class if required. Another real incident I faced was a stranger adult talking about how C edge college charges lots of fines maybe he had heard about the makeup classes . He was actually talking in quite an unpleasant manner about the college which of course I didn't feel really well about it because it was my college being talked about but also it was not on my part to argue which an adult outside with my uniform on. I'm sorry if my words went wrong somewhere and it appears inappropriate on my part to say it but I just felt like maybe if there is anyone who would take their time to hear something from one student of the institution then it wouldn't be so bad . Thankyou for taking your time to get through this and if my words were to reach to any of you then I thank this idea of the survey for a better environment ahead.

More assignment and presentation only burden students and that all students only copy paste the assignments so it's good if we opt for more class tests which can improve students in external exams

From my opinion, I get to understand all the subjects according to the way our teachers explained. There I no such ways I should give our teachers advice how to teach us they understand us.

Communication

All the faculties are excellent in their teachings and encourage an individual to improve our soft skills

Punctuality,pronounciation and abbreviations

1. Teachers need to identity students weakness and help students to overcome them
2. Teachers needs to stop Pressuring students
3. C edge college is good but it will be much better if the authority let the students involved in other curricular activities like indoor games, outdoor games , affiliated to ALL NAGALAND COLLEGE STUDENTS UNION (ANSCU)and give some power to the Students forum

Thank you

I leant many new things from our college teachers always teaches lesson us they taught very well

*More smart classes

* The teachers not to interfere the students life.

* Poor facilities

1. Personalized Learning Approaches
2. Enhanced Faculty-Student Interaction
3. Integration of Emerging Technologies

Let there be ranking system, Model exams for each semester, provide materials before explaining the syllabus and encourage the students to study these materials to get a better understanding of the topic

teachers should give equal treatment to the students

The main problem is there is no transparency in internal assessment. The teachers should tell the students to improve where he/she is lacking. The rest it's manageable

Help us to learn more

Helps us to be more active

Lastly they guide us in every good direction

-

1. use better graphics

Field trip, outdoor trip and other more activities

1. provide practical learning. 2. continuous feedback. 3. Provide Available books for students to refer the notes.

I think there should be given more opportunities in outdoor curricular activities and guidance by teachers and not only by the seniors to juniors and become one of us by cheering for us in the future

Equal opportunities

Equal internals based on performance

No partiality

1. Interact with students more and
2. to go outside campus to be more fresh

College should use projector while teaching.

All the staffs and teaching faculties are excellent

As of now nothing

- 1) More interaction with students
- 2) sometimes the weather here goes above 30 ° so we get tired so please give us some breaks

3) college facilities is not upto expectations and no events,programmes and extracurricular activities for the students 😞

Ensure your curriculum knowledge

Balance work and life

No comment

- 1.Need good facilities for better learning.
- 2.There should be students councling from time to time.
- 3.Extra curricular activities to improve our skills and to develop our personality.

Revision

•More effective teaching strategies.

•Punctuality

Overall good good.

No idea

- 1.Visits to historical places for more information and knowledge.
- 2.Think-pair-share and peer instruction.
- 3.camping and trips for relaxation of students and teachers.so,that relationship between teachers and students bonding becomes productive in learning process.

1. Improve the learning environment – Making the surroundings more engaging and inspiring to help students learn better and take lessons from every part of the curriculum.

2. Encourage faculty to be more expressive and joyful – Faculty members should be encouraged to bring more smiles to their faces and express genuine enthusiasm while teaching. It may sound playful, but seeing teachers engage in light, cheerful activities, such as dancing with joy in a non-awkward manner, can make the learning experience more enjoyable and impactful.

3. Organise more interactive events.

- 1) Integrate active learning technique
- 2) Enhance access to resources and support
- 3) Foster a sense of community

1. To explain each topics in details
- 2.Give good examples While Explaining
3. Strict action while giving explanation

No comment.

It is quite good for us to be under such mentor (teacher) to improve our personality and develop our learning

Not bad

Cg

More practical and Better facilities for teaching

1.the college should provide appropriate transportation while going for any occasion in college name.
